ABOUT ME

As a software developer, I am actively exploring various technologies within the realm of data. With a strong focus on data-driven solutions, I have been developing expertise in areas such as data analytics, data processing, and data visualization. Committed to staying at the forefront of emerging technologies, I am passionate about leveraging data to drive insights and create impactful solutions.

TECH STACK

- **Data Engineering and Analytics**
  - Google SQL (plx)
  - Google Clould Platform
  - Pandas, matplotlib, TensorFlow
- **Web Full Stack Development**
  - Python (Django, Flask)
  - PHP with Laravel Framework
  - REST, GraphQL APIs
  - MySQL, SQLite
  - JavaScript (ES6, npm, React.js, node)
  - Bootstrap, Tailwind
  - HTML5
  - CSS3
- **AWS Platform**
  - Pinpoint
  - SNS
- **Mobile Applications**
  - Flutter
- **Source Code management.**
  - Git
  - GitHub, GitLab

ESSENTIAL SKILLS

- **Communication** – Able to communicate every action item, and logical problems efficiently to resolve problems, provide solutions and insights.
- **Adaptability** – Embracing into different changes.
- **Time Management** – Resolving problems, forming solutions, and providing insights in a timely manner.

EDUCATION

2019 – 2023
Polytechnic University of the Philippines
Diploma in Information Communication technology
2017 – 2019
STI College Marikina
TVL MAWD Information in Communication technology
Senior High School

ACHEIVEMENT

- Galactic Problem Solver (NASA Space Apps Challenge) October 2019

WORK EXPERIENCES

- Data Engineering Analyst at Accenture Inc. (October 2022 – Present)
  - Deployed on a Google Account project with a day-to-day action item related to Data. Most of it are providing Analytics (Reports, Dashboard, Data Extraction and Transformation).

- Freelance Full-Stack Developer on Upwork platform
  - Integration of SMS communication line on a Chatbot system.

- Software Developer I at Signant Health (September 2021 – October 2022)
  - Handled various postprocessor software for data processing using Java.
  - Working in Agile environment.

- Software Developer Intern at RightValley (September 2020 – March 2021) and promoted as Associate Software Developer (April 2021 – August 2021).
  - Worked with various system development to different clients of the company.
  - Handled E-Commerce Mobile Application.
  - Assigned to Work with and ERP system.
